Originally adopted for use by the U.S. military, including the Special Operations Forces, Extended Cold Weather Clothing System (E.C.W.C.S.) Polartec Power Dry is exceptionally effective at wicking moisture away from the skin. Dual-surface system has a tough outer layer for rapid dissipation of sweat that has been drawn away from the skin by the inner layer.

This leaves a soft, dry surface next to your skin. And because layering is an essential part of cold-weather protection, the outer fabric is smooth-faced, so other layers slip on easily. Incorporates a high-loft grid channel back for enhanced breathability and superior moisture wicking. Offers even greater compression than conventional fleece for easier packing.

POLYGIENE ODOR CONTROL TREATMENT:

- Inhibits the growth of odor-causing bacteria for that fresh-all-day breathability
- Environmentally friendly: treated clothing can be worn for longer periods between wash loads
- Polygiene treatment is guaranteed for the lifetime of the garment
